Title: Materials: Sterling silver, resin.

People are born with their own palm lines. Fortune tellers read palms to talk about the life of people in their past, present, and future. In some cases, the people who believe in palm reading make decisions based on what fortune tellers say. However, this is not what I am trying to say through my work. I believe that no one can ever find the true meanings of those lines.

I closely observe my body in my work. I believe that the lines on my body tell secrets about me that I will never know. They could be about my past, present, or future. No matter what they mean, they are the symbols of my identity, no other palm lines can represent me. Therefore, it is so precious and so beautiful.
