

### YI-SHIN-LIU, TAIWAN

Title: balance Materials: Sterling silver and 24kr. gold leaf

These two pieces represent my faith that comes from my cultural heritage. I believe in harmony and balance. The Chinese believe that things have two extreme states, such as Yin and Yang. Too much of either causes disharmony. The two states should work together to create the great balance. The square represents Heaven and the circle represents Earth. Each piece contains both, which means the interaction of Heaven and Earth. The outlines etched with 24K gold foil show the chaos of the beginning of Heaven and Earth, while the off-centre design creates the interesting visual effect of “balance”.
