Mutterliebe- faith in motherly love

My pieces of jewellery represent personal symbols of the source and the deepest form of love.

Contrary to all social expectations, which are often very pretentious and even unattainable, I would like to focus on the essence of this kind of love: shelter, attention and absolute acceptance.

Source of inspiration:

My series "Mutterliebe" is dedicated to my daughter who was my source of inspiration. My deep feelings of tender attachment to her, which are rewarded by her smile, is very important to me and confirm my faith and behaviour. I'm very grateful to her for enriching my life and being a part of me.
